

MammoScan

No X-ray • No Compression • FDA Approved

Dr. Rose Thomas is a Board Certified Naturopathic Doctor

90% of Breast Cancer Cases are diagnosed with a palpable tumor size.

Over **90%** of women diagnosed with Stage 1 Cancer are alive 5 years later,

Unfortunately...only **58%** of Breast Cancers are diagnosed at this stage.

The MammoScan is a painless non-invasive exam that measures the body's temperature, finding suspicious areas **Years Earlier** than current exams. This allows time for life style changes that may possibly avoid terminal illness.

This FDA Approved Computerized Regulation Thermographic technology locates focal points of developing and existing dysfunction of the breast and body at the first sign of disease.

This Best Kept SECRET is a safe, painless early warning system that measures body function.

At **25** the body has hit its peak performance.

At **35** there may be a few aches and pains.

At **45** there are notable changes on exam findings.

By **55** few escape disease or illness.

Computerized Regulation Thermography finds dysfunction early so it can be addressed to possibly avoid a devastating disease or terminal illness.

Why wait when time is Life?
